Built only for manufacturers

Software and growth services from a team that has worked inside factories for 14 years.

ManufacturesTech is a technology and growth partner for manufacturers. We help owners move from registers and spreadsheets to systems they can trust, and from word-of-mouth orders to a steady flow of online enquiries. We bring the software, the training and the marketing, and we stay until everything works on your shop floor, in your stores and on your sales desk.

14 years in manufacturing

We have worked with factories since long before ERP was common, so we know stores, shop floors and purchase desks.

Authorized Sellerslogin partner

Proven software with local setup, training and support.

Software and marketing together

Your systems and your sales growth are planned as one project.

Process first, tools second

We fix the workflow before we configure the software.

Training for every role

Store keepers, supervisors, purchase and accounts teams are all trained.

Honest reporting

Clear monthly numbers on what is working and what is not.

Our zero-to-growth roadmap

Four steps, taken together or one at a time.

1 Foundation

Audit, brand and website basics.

2 Systemise

ERP, inventory and stock modules.

3 Visibility

SEO and content for buyer searches.

4 Scale

Paid campaigns and dealer leads.

Our mission, vision and promise

Mission

Give every manufacturer, small or large, the same quality of systems and market visibility that big groups enjoy.

Vision

A sector where decisions are made on live data and every good factory is easy for buyers to find.

ERP Software for Manufacturers

One live system that connects sales, purchase, production, inventory, quality, dispatch and accounts, built around BOMs, routing and work orders.

Production planning and control

Work orders from sales orders, capacity planning and stage-wise tracking.

Bill of materials and costing

Versioned BOMs and real cost per unit, so you know your margin.

Inventory and warehouse

Raw material, WIP and finished goods across plants and godowns.

Purchase and vendor management

POs from shortages, rate comparison and vendor performance.

Sales, CRM and dispatch

Quotes, orders, follow-ups and dispatch in one flow.

Accounts, GST and compliance

GST invoicing and accounts fed directly from the shop floor.

Manufacturing Inventory Software

One live record of every item, in every location and at every stage.

What it tracks

- Raw material, issued against the BOM
- Work in progress at each stage
- Finished goods: ready, reserved, free
- Multi-location stock and transfers

Key features

- Batch, lot and serial tracking with expiry
- FIFO, weighted average or standard cost
- Min, max and reorder alerts
- Barcode and QR scanning
- Variance reports and ABC analysis

Stock Management Software

Day-to-day control of what sits in your stores, so the line never stops for one missing part.

Control your stores

- Reorder levels and automatic alerts
- Godown, rack and bin locations
- Batch, lot and expiry (FIFO and FEFO)

Count with confidence

- Barcode and QR scanning
- Cycle counting and stock audit
- Reports that managers actually use

Manufacturing Digital Marketing

Campaigns that bring genuine buyers, dealers and distributors to your factory.

Google Ads

Intent-based search campaigns with call tracking.

LinkedIn marketing

Reach purchase heads and plant managers directly.

Website and landing pages

Specification-led pages with quick enquiry forms.

Email and WhatsApp

Nurture enquiries and keep dealers informed.

Content and video

Factory tours, process videos and case studies.

Dealer lead generation

B2B marketplaces and distributor campaigns.

Manufacturing SEO

Rank for the product, specification and location searches your buyers type every day.

Search visibility

- Keyword research for industrial buyers
- On-page SEO for product pages
- Technical SEO and site speed

Authority and reach

- Content marketing and buying guides
- Local and export SEO
- Link building and authority
